# Epicture User Documentation

## General:

In the box is the navigation bar. By clicking on one of the icons, you will be redirected to the requested page.

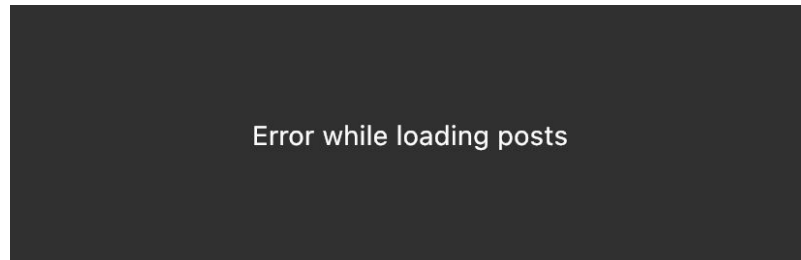

The colored icon shows you the page you are currently on.

## Gallery:

In the "Gallery", you will find a list of posts. You can drag down to see the next job.

The "Gallery" is composed of several posts in the form of cards, for more information, visit the "Posts" section.

If an error occurs during the recovery of the workstations, you will be informed by an error message like the image above.
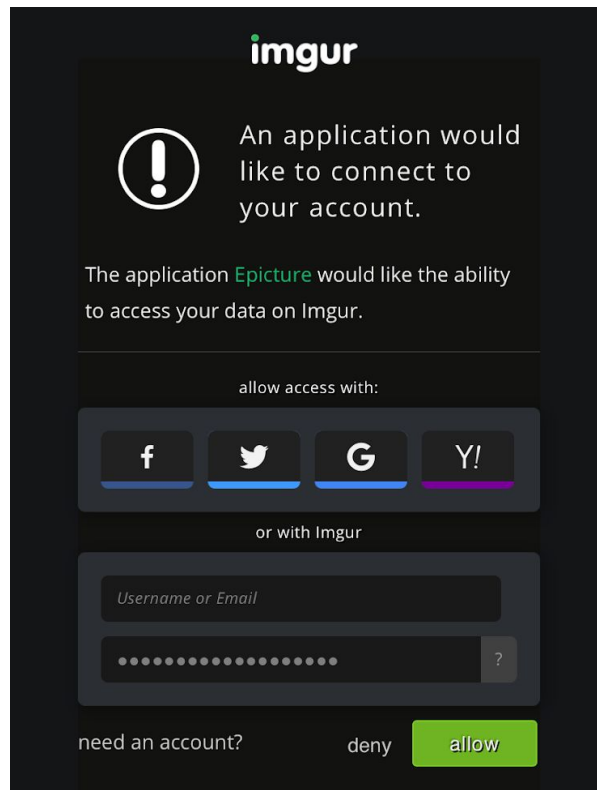

Search:

In the "Search" section of the application, you will be able to type your search in the red box and select filters in the blue box.

If the "time" filter is selected, you will have the choice among other time filters.

When you validate or change the filter, a new search taking into account your modifications is launched.

Once the search is completed, you will have a list of posts at your disposal.
Each post takes the form of a card. For more information on the posts, visit the "Posts" section.
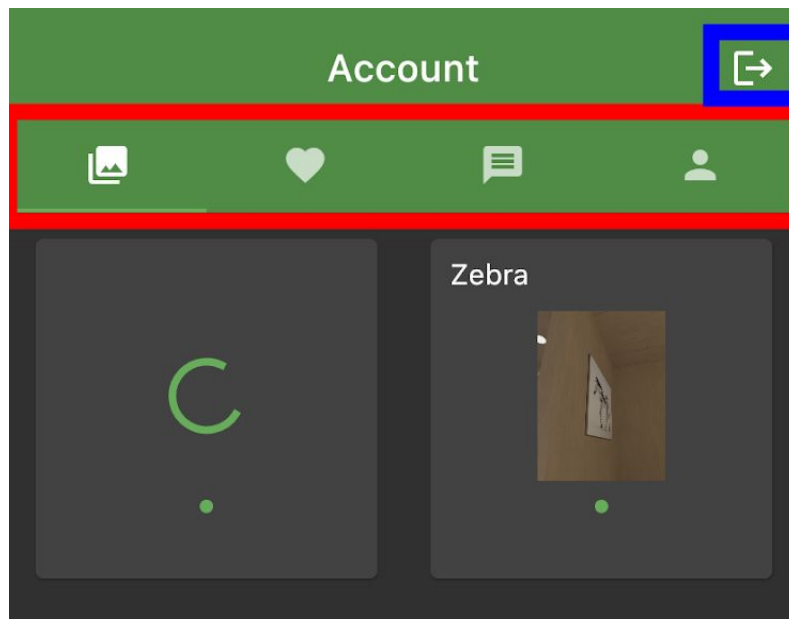

# Login:

The connection is made through Imgur's services. You will only have to enter your identifiers to allow the application to access your information.

Once logged in, you will not be asked to log in again until you manually log out.

# Account:

The first time you open the application, and until you log in, the "Account" part of the application will be denied. You will have to log in in order to benefit from the functionalities offered. (For more information, visit the "Login" section).
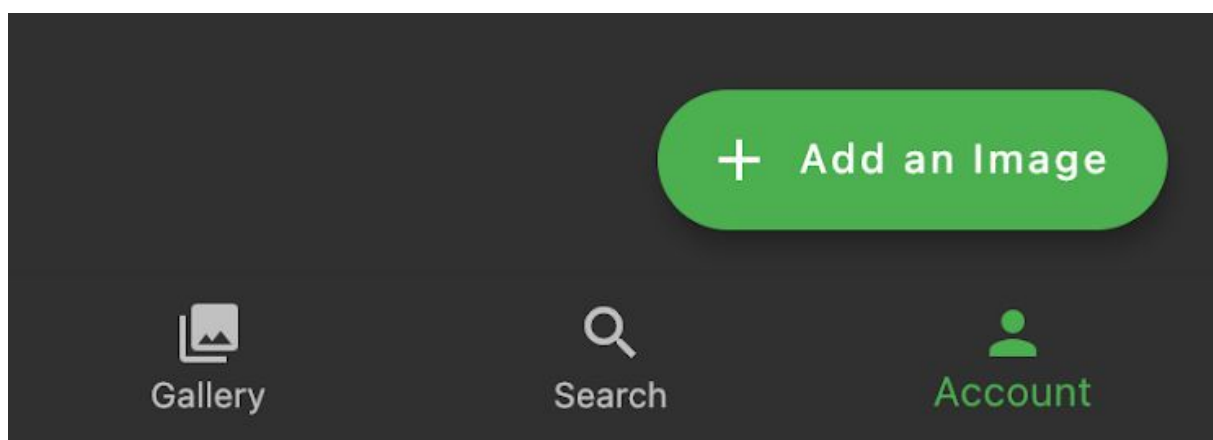

Once logged in, you will have access to several menus (shown in the red box in the image above).
These menus are respectively the access to the photos you have uploaded, the posts you have bookmarked, the comments you have sent and the settings of your account.

You will also have access to the logout button (shown in the blue box on the image).

Click on this button in order to log out, you will lose access to all the functionalities present in the "Account" part of the application as well as any other functionality requiring to be connected.

Finally you will have access to a button to post an image.
You will find more information in the "Add an image" section.

Here are the details of the sections you will find in the "Account" section:

Posts posted online:
In this section you will find a grid of the posts you have uploaded.
For more information, go to the "Posts" section.

Favorite posts:
In this section, you will find a grid of the posts you have added to your favorites.
For more information, go to the "Posts" section.

Your comments:
You will find a list of the comments you have added on the different posts of the application.

Settings:
In this section, you will find two subsections.

Imgur:

The first sub-section allows you to view and modify your Imgur account information.

In the red box, you will see your username and a pencil-shaped button to change your username.
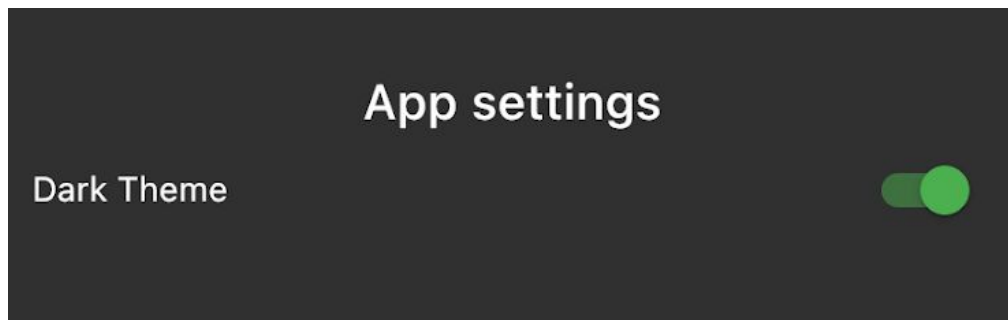

In the blue box, you will see your description as well as a pencil-shaped button to edit your description.

If you click on one of the pencils, you will be asked to write the replacement text. Once you have done this, all you have to do is press the "Send" button to apply the changes.

If you wish to cancel, you will only have to click on an area outside the popup.
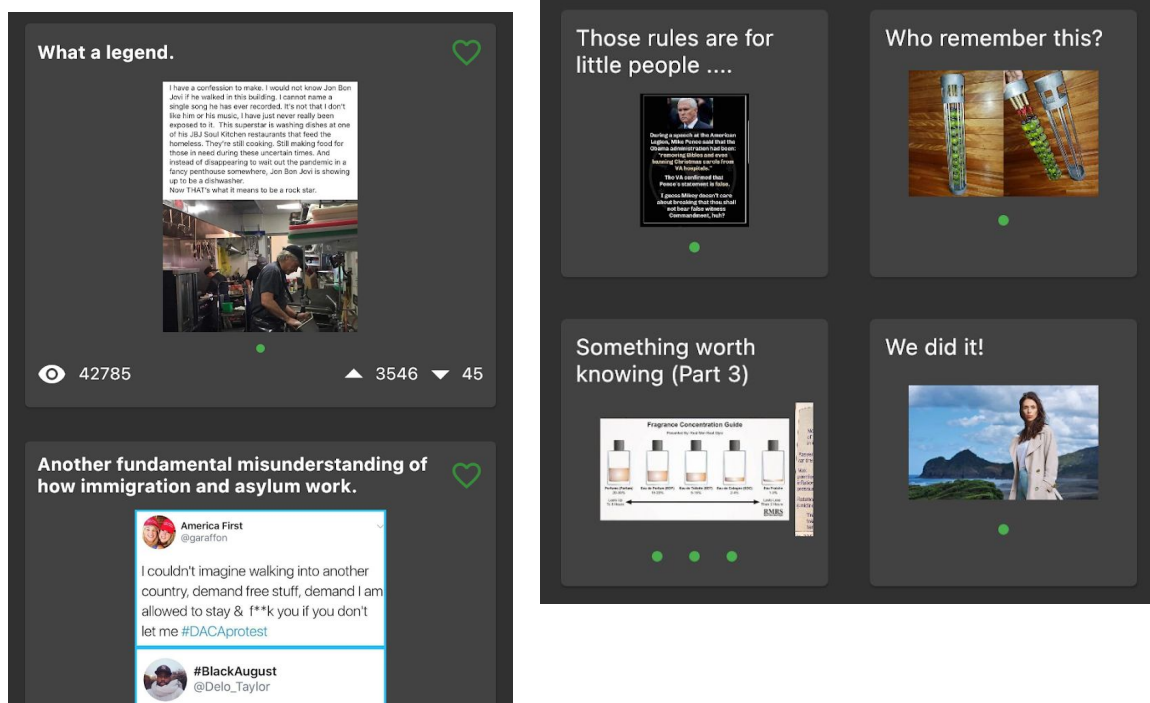

App settings:
The second sub-section allows you to modify the parameters of the application.

Currently the only parameter is changing the theme. Click the framed button to change the theme. You will have the option to use a dark theme or a light theme.
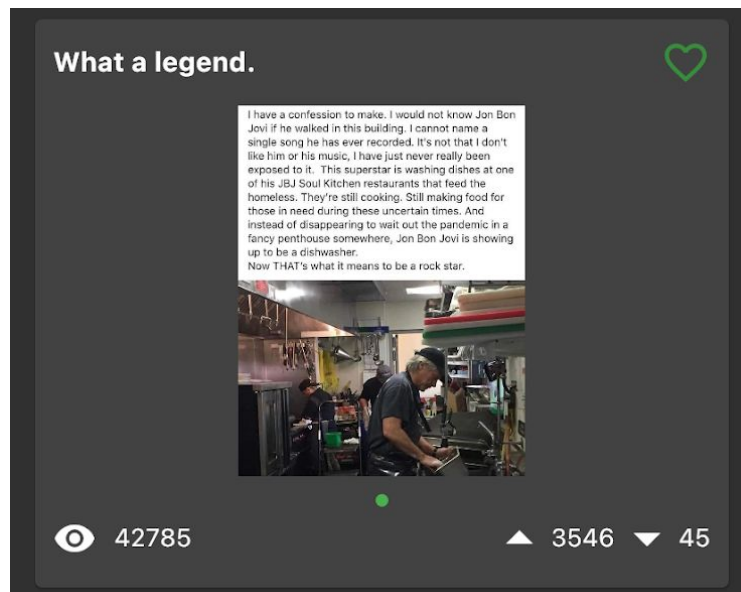

## Posts:

In the application, there are two ways to represent the posts, as a list (first image) or as a grid (second image).

In both cases, pressing on the post card will open the details of a post (see the "Post Details" section for more information).

In the list view, you will be able to view several items.

In the image above, you can see different information:
- The post title
- A heart-shaped button to add or remove a post from your favorites
- The number of views of the post
- The number of "upvotes" and "downvotes". You will be able to "upvote" or "downvote" a post by clicking on the arrows.
- In the center, an image carousel with, below, an indicator of the number of images for this post. If the post contains several images, you will be able to drag to the left or right to display the next pictures
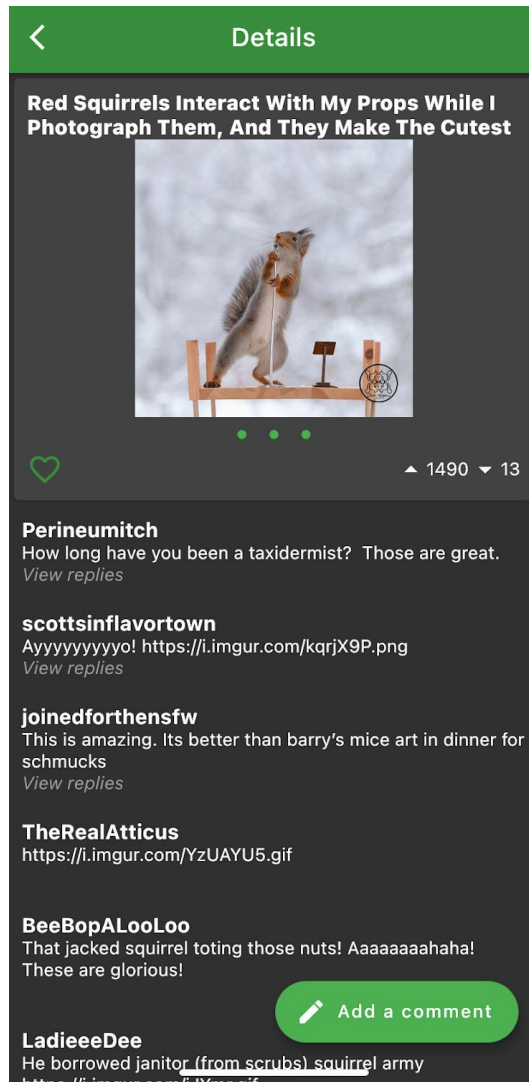

During the presentation in the form of grids, you will only be able to consult the title and the images.
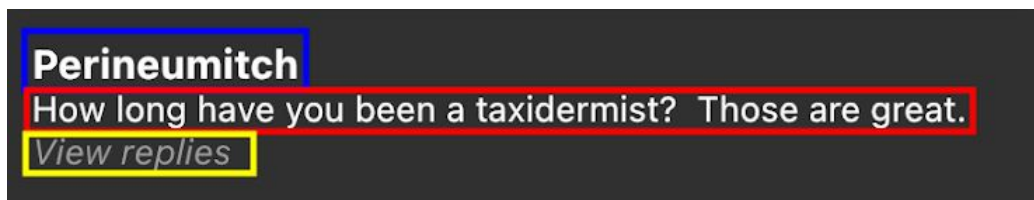

## Post details:

After clicking on a post, you will be taken to the details page of that post.
On this page, you will find the information presented on the post cards listed (see the "Posts" section for more information) so that you can list the comments for that post.

You can also press the image to make it appear in full screen.
Once in full screen, you will only have to press it again to get it back to its normal size.

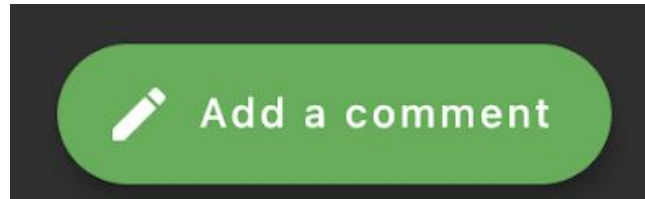

Each comment takes the following form:
-   In the red box, the name of the user who posted the comment is displayed
-   In the blue box, the commentary
-   And if there are answers, a clickable link to the answers to that comment (as in the yellow box in the example above)
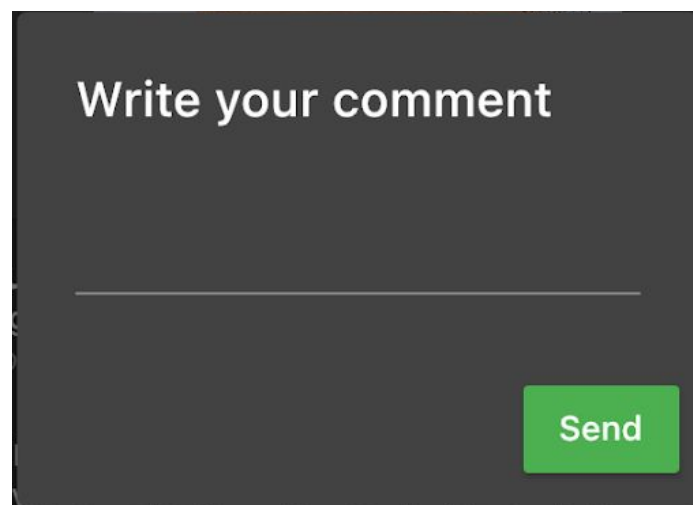

If you are logged in to the application, you will also be able to add a comment (visit the "Add a comment" section for more information).

## Add a comment:

In order to add a comment, you must be logged in to the application (see the "Login" section for more details).

By pressing the "Add a comment" button, a popup will open with a text field for you to write your comment.

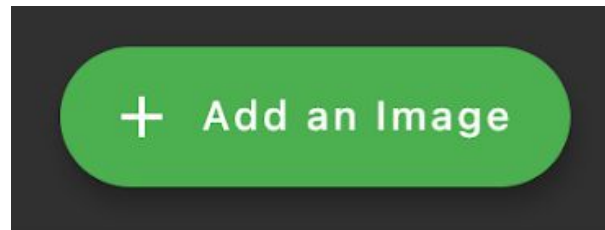

Once you have written your comment, press "Send" to send your comment.
If you don't want to send your comment anymore, just click outside the popup and it will disappear.

When you look at the answers, you will be able to reply to the comment by following the same procedure as explained above (only the "Add a comment" button will be different, it will be the "Add a reply" button).

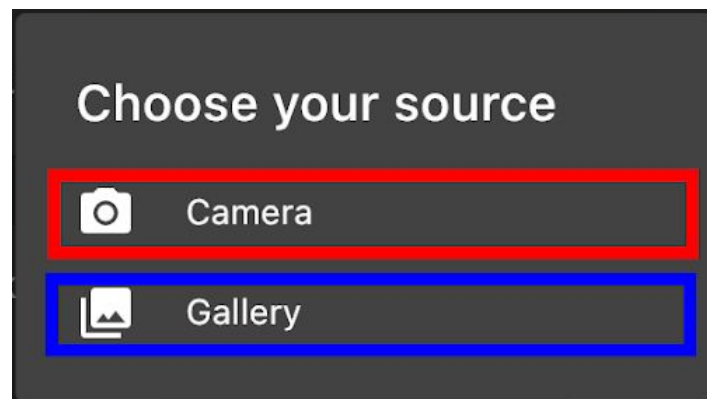

## Add an image:

In order to add an image, you must be connected to the application (see the "Connection" section for more details).

To add an image, you just have to be on the "Gallery", "Search" or "Account" page, you will then have an "Add an Image" button:
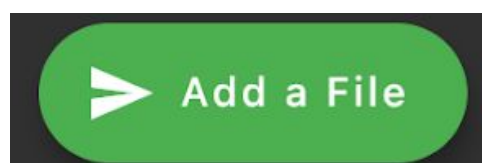

Click on this button and a pop up will appear asking you to choose the source of your image.

Click on the button represented by the red frame if you want to take a photo from your camera or on the button represented by the blue frame if you want to choose a photo from your photo gallery.

You will then have access to another page asking you to fill in the print and the description of the photo. These last fields are optional.

Press the "Add a File" button in the box to post your photo.

A popup will appear with a loading indication.

In case of failure, you will be redirected to the previous page.
In case of success, you will be redirected to your posts page.
